

## Determining Rise and Pet Door Opening Size (for one or more pets)

### Pet Door Opening Sizes

Size	Pet Safe Classic	Endura Flap by Patio Pacific
Small	5" x 7"	6" x 11"
Medium	8" x 11"	8" x 15"
Large	10" x 15"	10" x 19"
Extra Large	13 ¾" x 23"	12" x 23"

- Make sure your pet(s) can pass through the opening size you select.

Refer to the Pet Door Sizing Guide and the "**Before Installation**" diagram to determine your door's minimum rise. **We use 5" in the examples below.** Your door's minimum rise may be different. We use **Pet Safe Classic** opening sizes in the examples below..

**RISE:** Rise plus opening height should total 1"-2" above the tallest point (shoulder) of your pet's back. Additional rise can be added at the time of ordering.

Adding rise raises the pet opening up to increase step over height and your pet's ability to pass through without hitting the top of the opening.
